

INSTRUCTIONS*

So easy to use!

1

- Weigh the fabric while it is still dry to ensure you have enough dye.
- Carefully wash the fabric several times, especially if it is new, and check that its initial sheen has completely disappeared.
- Put on rubber gloves, empty the contents of the sachet(s) into the drum (not in the detergent tray or directly onto the fabric).

2

- Turn the fabric inside out, soak it thoroughly and put it into the machine without folding it.

3

- Do a 40°C cotton wash (without a prewash).
- Once finished, add laundry detergent and do another standard wash at 40°C for around 2 hours.

- Remove the fabric, add laundry detergent and do another wash at 40°C to clean the machine.

- Dry clothes without putting them in direct sunlight or a direct heat source.

Safe for future washes. Does not damage washing machines or septic tanks. We cannot be held liable for any damage caused by using this product improperly.

**For best results, please follow all of the instructions carefully.*
